Quiz . 20 Total Points

😊 Great job! Keep pushing for that perfect score! 🚀🌟

Your marks : 16 / 20

1. What is Data Warehousing?

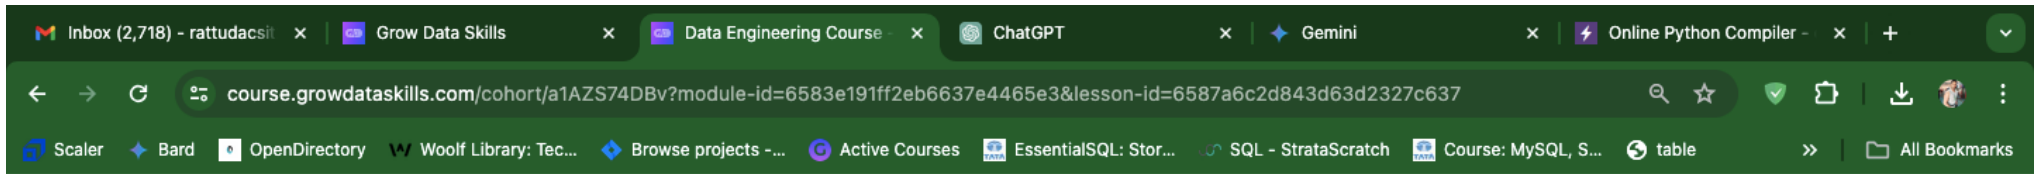

- ☐ It is a tool for building the data
- ☒ It is a process of transforming the data into information
- ☐ It is a process of extracting data
- ☐ All of the above

✓ Correct!

2. What is Data Modelling?

- ☐ It is a technique to visualize data
- ☒ It is a process of creating a data model for data to be stored in a database
- ☐ It is a process of retrieval of data
- ☐ None of the above

✓ Correct!

3. The ___ model is the simplest type of data model.

- ☒ Hierarchical
- ☐ Relational
- ☐ Network
- ☐ None of the above

✓ Correct!

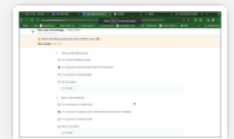

4. The most popular data model used today is the ___ model.

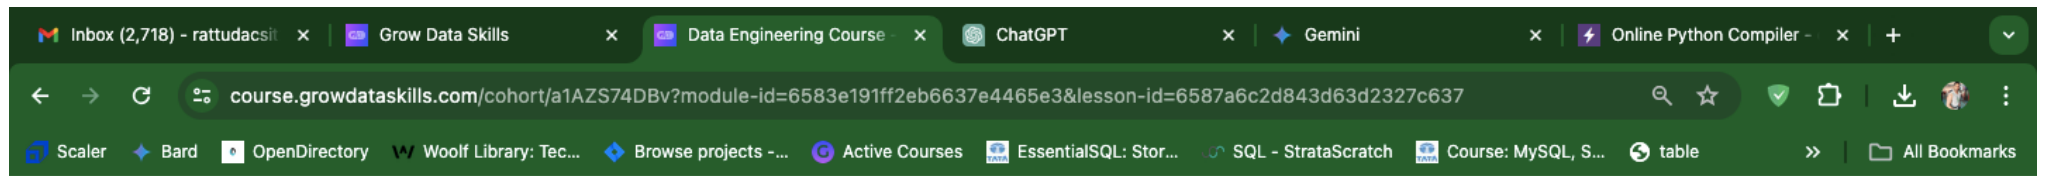

- ☐ Hierarchical
- ☒ Relational
- ☐ Network
- ☐ None of the above

✓ Correct!

5. In a data warehouse, data cleaning, data integration, and data consolidations are part of the ___ process.

- ☐ Data modelling
- ☐ Data extraction

5. In a data warehouse, data cleaning, data integration, and data consolidations are part of the ____ process.

- ☐ Data modelling
- ☐ Data extraction
- ☒ Data transformation
- ☐ Data loading

✓ Correct!

6. Data marts are ____.

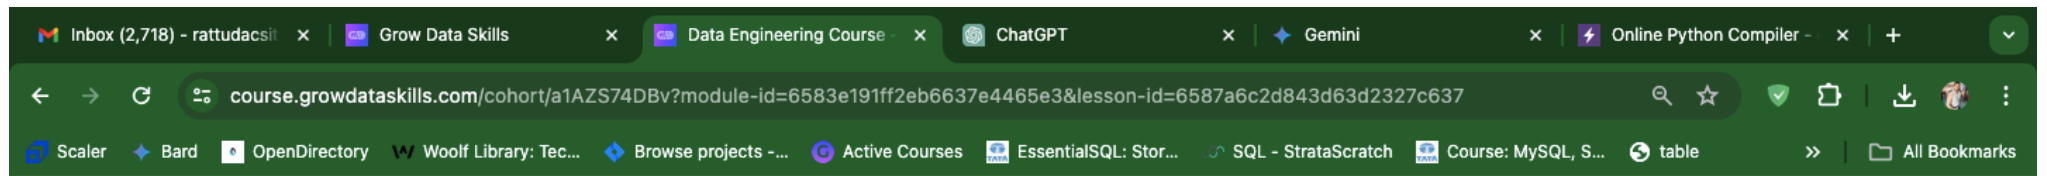

- ☒ A subset of a data warehouse
- ☐ The same as a data warehouse
- ☐ Larger than a data warehouse
- ☐ None of the above

✓ Correct!

7. OLTP stands for ____.

- ☒ Online Transaction Processing
- ☐ Offline Transaction Processing

7. OLTP stands for ____.

- ☒ Online Transaction Processing
- ☐ Offline Transaction Processing
- ☐ Online Transactional Processing
- ☐ None of the above

✓ Correct!

8. Which of the following is not a type of Data Warehouse system?

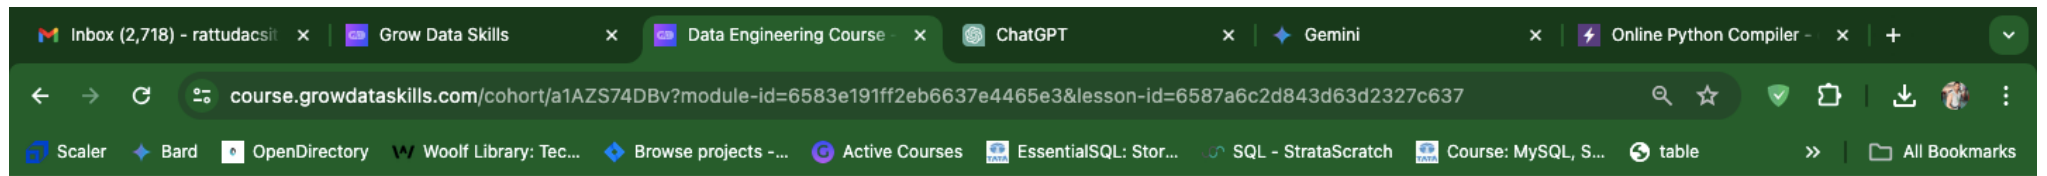

- ☐ Enterprise Data Warehouse
- ☐ Operational Data Store
- ☐ Data Mart
- ☒ Data Lake

✓ Correct!

9. Fact tables are ____.

- ☐ Always smaller than dimension tables
- ☐ Always larger than dimension tables

9. Fact tables are ____.

- ☐ Always smaller than dimension tables
- ☐ Always larger than dimension tables
- ☒ Can be smaller or larger than dimension tables
- ☐ Not related to dimension tables

✗ **Incorrect!**

Always larger than dimension tables is the correct answer

10. Dimension tables are ____.

- ☐ Always normalized
- ☐ Always denormalized
- ☒ Can be normalized or denormalized
- ☐ Not related to normalization

✗ **Incorrect!**

Always denormalized is the correct answer

11. The star schema consists of ____.

- ☒ One fact table and multiple dimension tables

11. The star schema consists of ____.

- ☒ One fact table and multiple dimension tables
- ☐ Multiple fact tables and one dimension table
- ☐ Only fact tables
- ☐ Only dimension tables

✓ Correct!

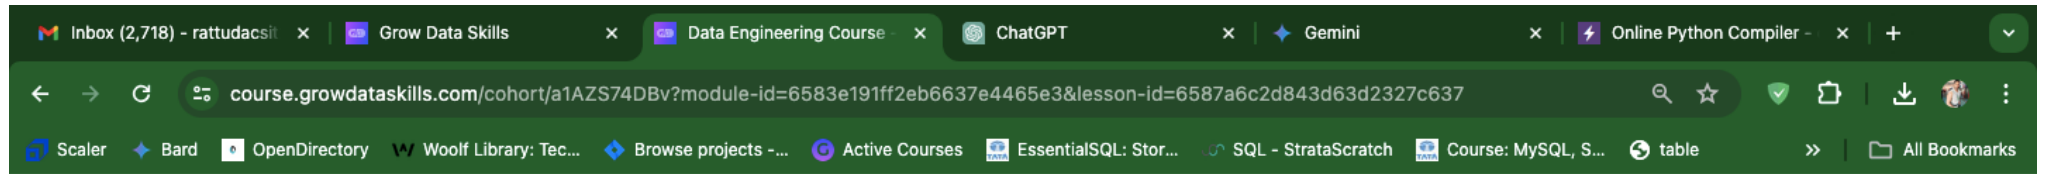

12. The snowflake schema is a(n) ____ of the star schema.

- ☒ Extension
- ☐ Subset
- ☐ Unrelated concept
- ☐ Opposite concept

✓ Correct!

13. Which of the following is not a type of Data Model?

- ☐ Hierarchical Model
- ☐ Relational Model

13. Which of the following is not a type of Data Model?

- ☐ Hierarchical Model
- ☐ Relational Model
- ☐ Network Model
- ☒ Sequence Model

✓ Correct!

14. ER Diagrams are used for ____.

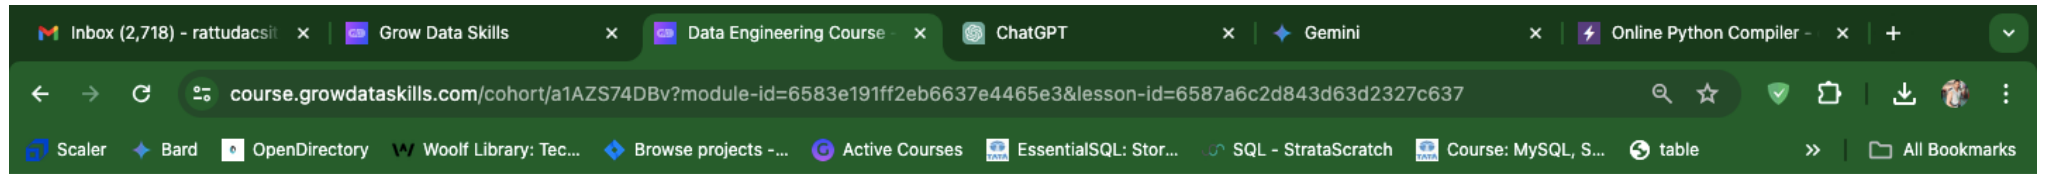

- ☐ Data Mining
- ☒ Data Modelling
- ☐ Data Manipulation
- ☐ Data Warehousing

✓ Correct!

15. In an ER Diagram, an oval represents a(n) ____.

- ☒ Entity
- ☐ Attribute

15. In an ER Diagram, an oval represents a(n) ____.

- ☒ Entity
- ☐ Attribute
- ☐ Relationship
- ☐ All of the above

✗ **Incorrect!**
Attribute is the correct answer

16. In an ER Diagram, a rectangle represents a(n) ____.

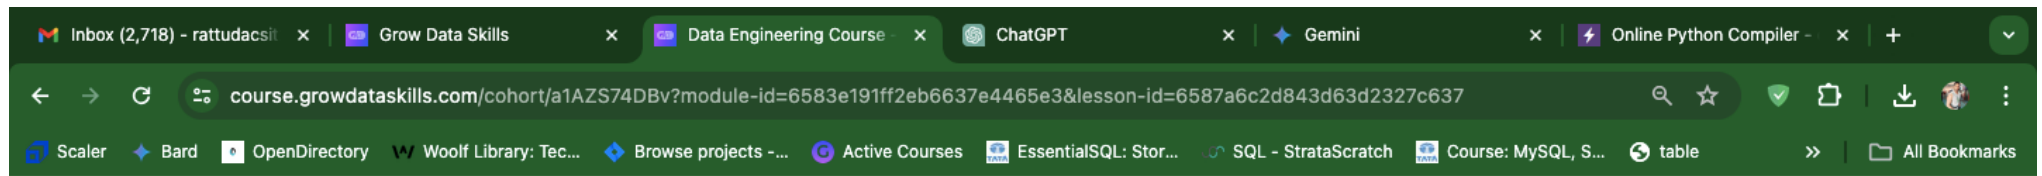

- ☐ Entity
- ☒ Attribute
- ☐ Relationship
- ☐ All of the above

✗ **Incorrect!**
Entity is the correct answer

17. A primary key is ____.

- ☒ A unique identifier

17. A primary key is ____.

- ☒ A unique identifier
- ☐ A duplicate identifier
- ☐ Can be null
- ☐ All of the above

✓ Correct!

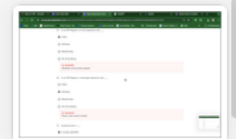

18. What is a foreign key?

- ☒ A key in a relational table that matches the primary key column of another table
- ☐ A key in a relational table that is unique for each record
- ☐ A key in a relational table that can be null
- ☐ All of the above

✓ Correct!

19. In data modelling, what is cardinality?

- ☐ The uniqueness of data values
- ☐ The sort order of data

✓ Correct!

19. In data modelling, what is cardinality?

- ☐ The uniqueness of data values
- ☐ The sort order of data
- ☒ The structural relationship between two entities
- ☐ The number of times an entity is duplicated

✓ Correct!

20. What is an operational data store?

- ☐ A long-term database system
- ☒ A database designed to integrate data from multiple sources for additional operations on the data
- ☐ A type of data lake
- ☐ All of the above

✓ Correct!
